**TOOLS:**

Pro Tech Toolkit (1)

## Step 1 — Vacuum

- Remove 4 screws on the bottom side using Philips screwdriver

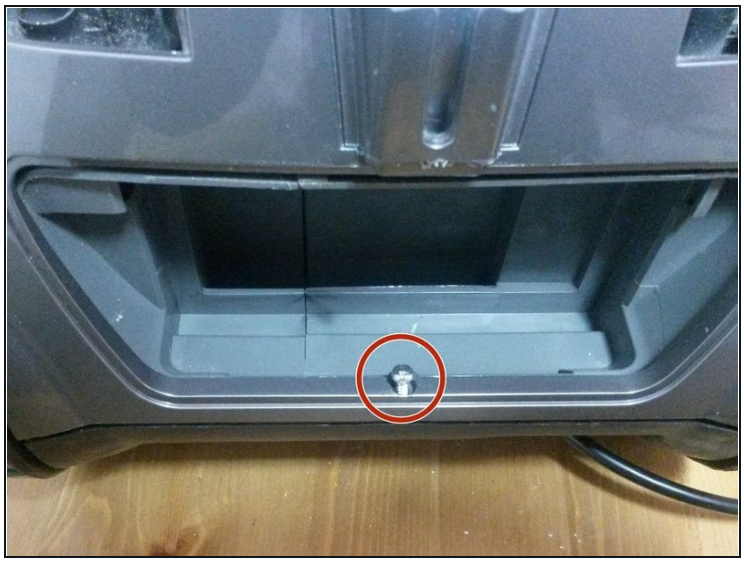

## Step 2

- Remove 2 buttons by levering them using slot screwdriver.
- Remove 2 screws.

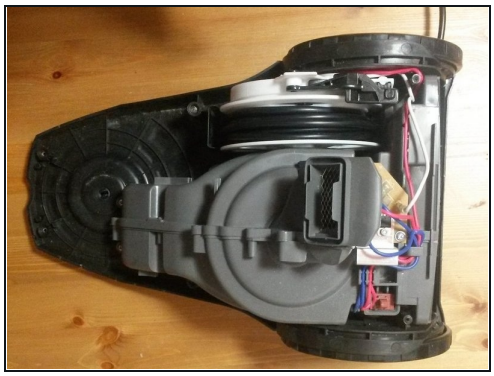

## Step 3

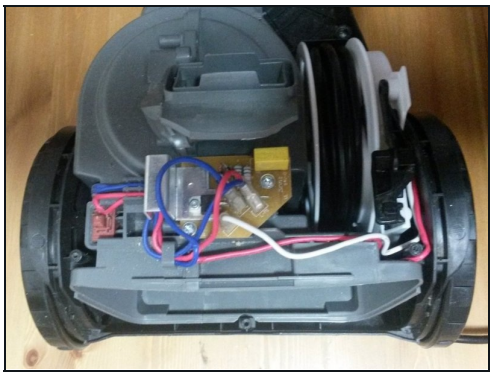

- Remove last spanner screw, maybe you can do it using spanner head (pig nose) screwdriver.
- I have made special key to turn it using piece of 1mm wire and screw.

## Step 4

- Now you can see how it looks inside, get access to engine or cable roller.
